Summary

Full-Stack Developer specializing in the MERN stack and Next.js, with a track record of independently designing and shipping end-to-end web applications — from system architecture to deployment. Comfortable working across real-time systems, payment integrations, containerized deployments, and AI-driven features, backed by strong problem-solving skills with 100+ DSA problems solved.

Technical Skills

Languages: JavaScript, TypeScript, Python, C++, SQL
Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, Socket.io, JWT Authentication
Databases: MongoDB, MySQL, PostgreSQL, Redis
DevOps & Tools: Git, GitHub, Docker, Linux, Postman, Vercel, Excel
Fundamentals: Data Structures & Algorithms, OOP, System Design, API Security

Experience

Pulpy Digital Media OPC Pvt. Ltd.

May 2026 – Present

Intern – Software Developer

- Partnered with the engineering team to design and ship full-stack features directly into a live production codebase, following structured Git workflows and peer code reviews.
- Worked closely with senior developers to apply scalable system design principles and industry-standard engineering practices beyond academic coursework.
- Applied strong debugging and problem-solving skills to catch issues early and consistently deliver reliable, production-ready code.
- Strengthened backend fundamentals through hands-on exposure to performance optimization, caching strategies, and modern deployment workflows.

Projects

PDF SaaS – PDF, Image & Dev Tools Suite | *Next.js 16, React 19, TypeScript, Docker*

[Live](#) | [GitHub](#)

- Built a monorepo SaaS platform offering 50+ tools for PDF, document, image, and developer utilities using Next.js 16, React 19, and TypeScript.
- Designed a privacy-first architecture: lightweight operations run client-side via pdf-lib and WebAssembly, while heavier jobs are processed server-side purely in-memory with zero persistent file storage.
- Containerized the full stack with Docker, bundling LibreOffice, Ghostscript, qpdf, Poppler, and Tesseract OCR for one-command production deployment.
- Built an Express.js microservice for authentication, CRM, and feedback pipelines, alongside an admin portal for user management and analytics.

Vingo – Food Delivery Platform | *React 19, Express.js, MongoDB, Socket.io, Razorpay*

[Live](#) | [GitHub](#)

- Designed a multi-role architecture (Customer, Shop Owner, Delivery Partner) with JWT-based access control across 13+ pages and 6+ MongoDB models.
- Built a live order-tracking system using Socket.io and React-Leaflet, delivering real-time location updates and dynamic ETA calculations.
- Enabled secure checkout with Razorpay and OTP-based delivery confirmation via Nodemailer.

Vybe – Social Media Platform | *React, Express.js, MongoDB, Google Gemini API, Socket.io*

[Live](#) | [GitHub](#)

- Designed a full-stack social platform with 10+ features (posts, reels, stories, follow system) using Redux for centralized state management.
- Added AI-powered auto-captions via Google Gemini API and optimized media delivery with Cloudinary CDN.
- Built real-time notifications and live interactions using Socket.io for instant, low-latency updates.

Certifications & Achievements

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – [Verify](#)

Adobe India Hackathon 2025, Round 1 – competed in a team of 3 on problem-solving and coding challenges.

Solved 100+ DSA problems on LeetCode/GeeksforGeeks.

Education

Dr. Ambedkar Institute of Technology for Divyangjan

Kanpur, Uttar Pradesh

Bachelor of Technology (B.Tech) – Information Technology, GPA: 7.5/10.00

2022 – 2026
